Players can always select the first upgrade but must choose an upgrade path starting from the second upgrade.

Towers 1: Melee AoE pulses

Upgrade path 1:

1. Simple increase in attack range
2. Attacks have a chance at poisoning enemies it hits, causing them to take damage over time until they die.
3. Poison does more and more damage over time.

Upgrade path 2:

1. Simple increase in attack speed
2. Attacks have a chance of paralyzing the enemy it hits, causing them to stay in place for a little while.
3. If an enemy gets paralyzed, they will stay in place at random times after their initial paralyzation.

Tower 2: Single target ranged

Upgrade path 1:

1. Simple increase in attack range.
2. Tower can hit everything on screen.
3. Attacks can destroy any type of enemy.

Upgrade path 2:

1. Simple increase in damage.
2. Attack ricochets to next enemy, dealing half damage to it.
3. Ricochet extends to two more enemies.

Tower 3: AoE ranged, slow attack speed

Upgrade path 1:

1. Simple increase in damage.
2. Causes attacks to burn enemies for a while, doing damage over time.
3. When an enemy is burned, it causes the burned enemy to explode occasionally, burning enemies around them.

Upgrade path 2:

1. Simple increase in AoE.
2. Causes attacks to cool enemies for a while, causing them to move slower.

3. If a cooled enemy is hit by this attack, it causes the enemy to stay in place for a little while.

Tower 4: Mine that produces gold the player can tap on to earn money

Upgrade path 1:

1. Gold earns more money
2. Added random chance of getting a ruby, which sells for 3x the amount of money
3. Added random chance of getting a diamond, which sells for 10x the amount of money

Upgrade path 2:

1. Produces gold faster
2. Produces gold even faster and collects it automatically
3. Random chance for a gold fever event, causing gold to be produced at 5x the rate for a short while.

Tower 5: Tower that spawns allies

Upgrade path 1:

1. Allies that block ground troops.
2. Allies have more hp
3. Allies can block 2 enemies at once

Upgrade path 2:

1. Allies that block aerial troops.
2. Allies have more hp
3. Allies can block 2 enemies at once

Tower 6: Trap producer

Upgrade path 1:

1. Faster production
2. Spawns two traps at once
3. Weaken enemies

Upgrade path 2:

1. Simple increase in damage
2. Traps will last for 2 enemies
3. Increase trap size

Final Towers:

Tower 1: Blood amplifier (Blood production and support tower):

The blood amplifier allows you to obtain more blood from slain enemies within a certain radius. Upgrades can unlock additional effects.

Upgrade path 1: Increase blood production

1. Blood cell multiplier:

Increases the amount of blood gained from slain enemies within the radius.

2. Advanced emitter:

Increase the radius of the effect.

3. Rare side effect:

Random chance of getting 5x as much blood from a slain enemy.

Upgrade path 2: Additional effects:

1. Blood thickening:

Slows enemies down by a little when they’re within the radius.

2. Increased pressure:

Increases damage dealt to enemies within the radius.

3. Full modification:

Effects will not go away, even if the enemy has left the radius.

Tower 2: Black magic tower (Grounded, AoE pulses around tower)

Creates pulses of dark magic that damages enemies by attacking their life force directly.

Upgrade path 1: Increase in damage:

1. Intense magic:

Increases damage dealt to enemies.

2. Persistent effect:

Causes hit enemies to take damage over time for a short while.

3. Forbidden knowledge:

Increases the radius of the dark magic pulses. The effect of ‘Persistent effect’ now stacks.

Upgrade path 2: Necromancy:

1. Tough end:

When an enemy is slain by this tower, they will emit a dark magic pulse from their body, damaging enemies around them.

2. Double pulses:

The tower will release two pulses at once when attacking.

3. It doesn’t end there:

When an enemy is slain, they will be resurrected as a ghost. They will fly back to deal half their original health to the first enemy in line at the time of the enemy being resurrected.

Tower 3: Dark turret tower (Ranged tower):

Shoots at enemies from a range. Can hit air units.

Upgrade path 1: Single target:

1. Reinforced ammunition:

Increases damage per hit.

2. Twin ammunition:

Turret shoots two bullets right after one another per shot.

3. Magical vision:

Turret now has infinite range.

Upgrade path 2: AoE:

1. Shattering bullets:

Causes the bullet to shatter when having hit an enemy, damaging nearby enemies in a small radius of the impact.

2. Exploding bullets:

Adds a burning effect on all enemies that got hit either by the initial bullet or the shattered one, causing them to take damage over time for a little while. Also increases the radius of the impact.

3. Magical gunpowder:

When an enemy dies when the burning effect from ‘Exploding bullets’ is active, they explode, damaging nearby enemies in a fairly big radius.
